VISUAL FIELD TEST (PERIMETRY) RESULT

Patient Name:	John A. Doe	Patient ID:	TEST-000123
Date of Birth:	01-Jan-1990	Sex:	Male
Test Date:	07-Aug-2026	Examiner:	Dr. Jane Smith (Sample)
Device:	Humphrey Field Analyzer (Simulated)	Strategy:	SITA-Standard 24-2

Reliability Indices

Index	Right (OD)	Left (OS)
Fixation Losses	1/15	2/16
False Positives	2%	3%
False Negatives	1%	4%

Global Indices

Index	Right (OD)	Left (OS)
Mean Deviation (MD)	-1.42 dB	-2.85 dB
Pattern SD (PSD)	1.60 dB	2.10 dB
Visual Field Index (VFI)	97%	93%

Interpretation

Right eye field is essentially full with no significant scotomas detected. Left eye shows a mild, non-specific reduction in sensitivity in the superior nasal region, within normal limits for age but recommended for monitoring. No pattern consistent with glaucomatous field loss identified at this visit.

Recommendation

Follow-up required: Yes — Repeat visual field in 12 months
